

DINESH KUMAR P

AIML Engineer

dineshtrichy168@gmail.com • 8925363945 • Trichy,Tamil Nadu

www.linkedin.com/in/dineshkumar-p-909a2232a

SUMMARY

Undergraduate in Electronics and Communication Engineering and passionate about AIML with strong foundation in **communication, programming, Machine Learning, Deep Learning**. Eager to apply my skills in real-world projects and contribute to innovative tech solutions. Intense about continuous learning and excited to begin a professional journey in the IT industry.

PROFESSIONAL EXPERIENCE

Internship

AIML Engineer

Dec 2025 – Jan 2026 | Jaipur, Rajasthan

- Developed a machine learning-based spam email classification system involving text preprocessing, feature extraction, model training and evaluation

EDUCATION

B.E. in Electronics And Communication Engineering

Rajalakshmi Engineering College, Chennai

Sep 2024 – Present | Chennai

CGPA: 7.8

HSS

Cauvery Global Senior Secondary School, Trichy

June 2022- April 2024

SSLC

Mahatma Gandhi Centenary Vidyalaya, Trichy

June 2020- April 2022

SKILLS

- **Programming Languages:** Python
- **Libraries:** Scikit-Learn, Tensorflow, spaCy, NLTK
- **Tools:** VS Code, Colab, Jupyter Notebook

PROJECTS

Cardeko Car Price Prediction Model

Python, Scikit-Learn

- Cardeko's Price Prediction Model utilizes Machine Learning algorithms to **accurately forecast the market value of used cars**. This tool assists buyers and sellers in making informed decisions by providing reliable price estimates tailored to specific vehicle attributes and market trends.

Tesla Stock Price Forecasting Using LSTM

Python, Tensorflow

- This project aims to develop an LSTM-based model to **forecast Tesla's stock prices based on historical market data**. By analyzing past price pattern and market trends, the LSTM model will generate predictions that can assist stakeholders in anticipating future price movements and optimizing investment strategies in the volatile stock market environment.

Tesla Autopilot Clone-Object Detection

Python, Computer Vision

- Develop an advanced computer vision models to **detect object on road such as vehicles, pedestrians and traffic signs**. This project aims to ensure reliable performance of Tesla's autonomous driving technology, enhancing overall road safety and user confidence
